We also believe in investing into start-ups that have a very high potential to grow. We also invest in the hedge funds and asset management firms.

The very next day, or just a few days after the creation of a deposit, you will start receiving the profits according to the chosen plan. We place the capital on the basis of diversification programs in three areas of focus

BIZGLOBE INVESTMENT LIMITED is an International Investment company, officially registered in Thailand, it was launched in 2nd January, 2017. The company has direct contracts with professional traders and miners around the world that guarantees the best services and ensures profits are made and remitted to investors daily.

It was established by a group of professional traders and investors, who have fore seen the future of crypto currency.

BIZGLOBE INVESTMENT LIMITED is founded on the principle that cryptocurrencies is changing the fundamental structure of not only our economy and banking systems but also the way we connect and engage as human beings.

Our programs are backed by Gold Trading and Mining, Forex Trading and investing in various funds and activities. Well-planned and diversified distribution of funds increase the stability of our programs for the long term. Our services allow reducing risks for beginners and getting average stable income from markets.

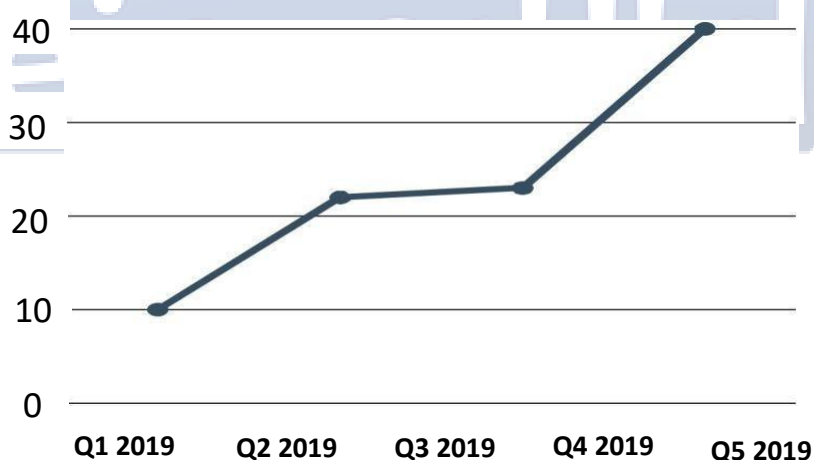

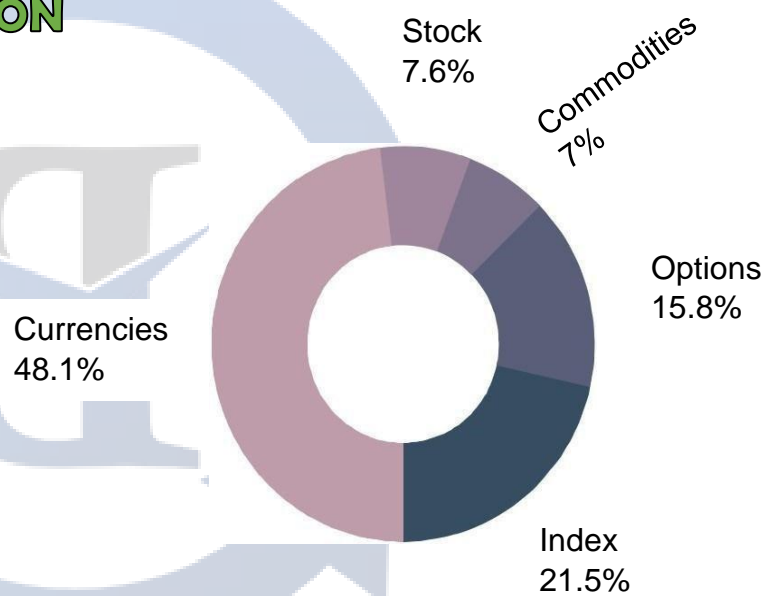

HOW TO EARN WITH US

The model is simple: using human and mathematical models, we spot trade opportunities on commodities such as gold, diamond, natural gas and so many others, as well as cryptocurrencies. Then the investment made by clients is distributed by quota into these assets, using artificial intelligence. The profit generated is distributed to investors with a valid investment plan, and according to the investment package enrolled in. Trade calls are backed by other stakes to bet the market flotation in order to avoid loss to the clients as minimum as possible, where this returns are been done 5 times in a week.

We use a kind of margin known as PAMM (percent allocation management module) which makes sure these profits are always allocated. If any losses occur, it is managed by the company not its investor (thanks to our internal investment insurance policy). This means the investors always get their allocated profit. This is an apt example of a win-win approach for all clients. Investors are meant to select a package where this generated profits are distributed based on what is invested (higher investment plans attract higher returns on investment), withdrawals are made weekly or monthly, and are paid out in cryptocurrencies (bitcoin).

PORTFOLIO ASSETS DISTRIBUTION

Identifying meaningful investment opportunities all these, in the financial market is getting more challenging. Most investors go through a series of advice and still miss out On the ideal assets distribution for a profitable portfolio. So, we took the guess work out of the way and put the work on our shoulders. We designed a portfolio structure that makes the investment both secure and profitable at the same time opportunities. We identify and analyze emerging trends in the markets. Then we put together the market dynamics, regulations and strategies that are constantly impacting the markets, in order to obtain optimum output. Considering all these, we design investment classes to adapt to clients goal at the point of entry. That's why each investor feels like the only one we have. We make it all bouts the investor.

AFFILIATE PROGRAM

BIZGLOBE INVESTMENT LIMITED rewards loyalty with royalty. Take advantage of our affiliate marketing programs.

Standard: Earn **5%** more with every referred investor.

RISK MANAGEMENT AND SECURITY OF FUNDS

Our first step towards risk management is identification and assessment of the risks involved in our investment strategies, which in this case involves the following: loss of investment capital through mismanagement of funds, losses due to general market downtrend, losses due to cyber-attacks and system failures. Upon successful identification and assessment we employ the following strategies:

-Avoidance: we avoid mismanagement of funds by employing skilled traders with a minimum of six years' experience in the financial sector or at least three years in the stock exchange market.

-Reduction: we reduce losses due to general market downtrend by investing in commodities like Gold to ensure consistent profit generation.

-Sharing: sharing losses between regular investors and stakeholders minimizes the total percentage loss per investor; this ensures that we maintain the minimum achievable profit for every investment plan.

-Retention: we also budget for cases of cyber-attacks by mapping a significant percentage of the company's profit monthly for system maintenance and general security upgrade. In conclusion, we intend to get to the top of the crypto investment market and maintain our position against all odds for as long as it's humanly possible. Our teams of experts are constantly working towards the development of new and advanced trading strategy for consistent guaranteed profits

GOLD

Gold provides hedge against inflation, Gold provides hedge against global instability, Speculate on demand growth, Portfolio diversification

FOREX

Forex trading is the act of buying or selling currencies. Banks, central banks, corporations, institutional investors and individual traders exchange foreign currency for a variety of reasons, including balancing the markets, facilitating international trade and tourism, or making a profit..

CRYPTOCURRENCY

With cryptocurrency being young, and the market being historically volatile, there is no yes or no answer about the wisdom of investing in cryptocurrency. It is with this in mind that we cover some pros and cons and friendly (but not professional) advice.

STOCK

Invest in commodity-related stocks. Buying stocks to relate to certain commodities is a way to bet on the value of a commodity without incurring all of the risk of futures trading. Commodity investments tend to attract more investor attention when inflation fears start to mount.
